THE APPRAISAL OF CONTENT IS TENTATIVE.  
(FOR KEY SEE REVERSE)

25X1

- One of the most important fuel and ammunition depots east of the Danube is located in the Domoszló and Feldebrő region.
- The gasoline depot (No. 1 on the enclosed sketch) consists of five tanks, each with the capacity of approximately 500 tons. The tanks are located in tunnels at the foot of a sandy hill. They are used exclusively for the storage of aviation gasoline. The depot comes under the jurisdiction of the Soviet Air Force and is guarded by Soviet soldiers wearing blue shoulder boards.
- The ammunition depot (No. 2 on the enclosed sketch) was rebuilt in 1950 by a Hungarian firm specializing in underground construction. Antiaircraft and antitank ammunition of all types is stored here. The depot is run by the Soviet Army and is guarded by about 100 Soviet soldiers with black shoulder boards.

25X1

It is estimated that the content of the depot is the equivalent of about 300 freightcars. A spur line connects the depot with the main railroad line that passes about 150 m. to the east.

Legend to the Enclosed Sketch:

- Gasoline depot
- Ammunition depot
- Guardhouse

-2-

25X1

4. Repair shops and garages for the trucks
5. Quarters for the commandant and the officers of the depot
6. Quarters for the guards and the service personnel
7. Ammunition depots, each about 25 by 10 m.
8. Ammunition depots, each about 15 by 8 m.
9. Ammunition depots, each about 12 by 8 m.

All these depots rest on concrete foundations about 50 cm. thick. These are light brick structures, with thin walls and flat roofs painted green. There are several old oaks, with heavy foliage, between the various buildings, making them difficult to observe from the air.

Annex: Sketch - map of Soviet gasoline and ammunition depots in the Domoszlo and Feldebró region (1 page).
